

Electrician

Alderney Electricity Ltd

Alderney Electricity Ltd (AEL) is the sole provider of electricity to the island of Alderney. From our power station at York Hill, we generate and distribute electricity through a HV/LV network to homes and businesses across the island. We also supply fuel oils for transport and heating.

We're entering an exciting new chapter — transitioning toward renewable energy and upgrading vital island infrastructure. As part of this journey, we're looking for a qualified Electrician to join our skilled and friendly team.

What You'll Do

In this varied and hands-on role, you'll be involved in:

- Installing, maintaining, testing, and repairing electrical systems across domestic, commercial, and industrial settings
- Training to become competent in high and low voltage (HV/LV) distribution network operations
- Learning LV and HV cable jointing through internal and UK-based courses
- Supporting and mentoring AEL's Electrical Apprentices
- Managing and delivering third-party maintenance contracts
- Ensuring all work meets AEL's safety standards and procedures

What You'll Bring

- City & Guilds Level 3 in Electrical Installations (or equivalent)
- Ability to work independently and within a close-knit team
- Flexible, proactive attitude and good problem-solving skills
- Willingness to undertake further training to progress toward AEL Electrical Engineer status (fully supported by AEL)

Why Join AEL?

- Competitive salary
- Excellent benefits including pension and healthcare
- All training provided — including HV certification
- Real opportunities for progression and professional satisfaction
