

Mechanic

Alderney Electricity Ltd (AEL) is the sole provider electricity to the island of Alderney. From our Power Station at York Hill, we generate and distribute electricity through our HV/LV network to homes and businesses across the island. We also supply fuel oils for transport and heating.

We're entering an exciting new chapter – transitioning toward renewable energy and upgrading the Power Station workshop. As part of this journey, we are looking to recruit a new Mechanic to join our skilled and friendly team.

What You'll Do

In this varied and hands-on role, you'll be involved in:

- Maintenance and repair of company vehicles with training and development to enable you to become competent in the diagnostics and repair of AEL's diesel and electric vehicles.
- Assistance in the installation, maintenance, testing and repair of mechanical systems and assets at the Power Station site.
- Ensuring all work meets AEL's safety standards and procedures.

What You'll bring

- Good working knowledge of vehicles, diesel engines and auxiliary systems.
- Ability to work independently and within a close-knit team.
- Flexible, proactive attitude and good problem-solving skills.
- Full driving licence with category C.

Why Join AEL?

- Competitive salary.
- Excellent benefits including pension and private healthcare.
- All training provided.
- Real opportunities for progression and professional satisfaction.
